

Mission

The purpose of the IEEE TC on DPSs is to promote activities within the field of distributed parameter systems concerning both basic scientific methodology and applications. What is more, this website is supposed to serve as a resource for researchers and engineers working in areas related to DPSs. Specifically, the following is a concise summary of our intentions:

- provide an informational forum for exchange of ideas and experience
- promote identification and integration of approaches

The activities include the following:

- organizing tracks of invited sessions, panel discussions, tutorials, minicourses
- organizing workshops and sessions of technical meetings of the Society or of the IEEE
- preparing special issues of journals
- assistance in the review of papers submitted to society conferences
- assistance in the review of papers within the scope in cooperation with journal and magazine editors
